

The *Clearly Aqua Slim Line* Reverse Osmosis Units

12" models shown, 10" models also available

The *Clearly Aqua Slim Line* Delivers the Quality Water You Deserve

Advantages

- Clean, Delicious Water for Drinking and Cooking
- Great for Low Sodium Diets
- Small, Compact Design
- Quick and Sanitary Twist-off Filters

Clean Drinking Water

Reverse Osmosis is the optimal way to rid water of impurities. Specially designed for house and apartment usage, R.O. systems utilize home water line pressure to push tap water through a special membrane. This process significantly reduces the contaminants and conveniently rinses them down the drain.

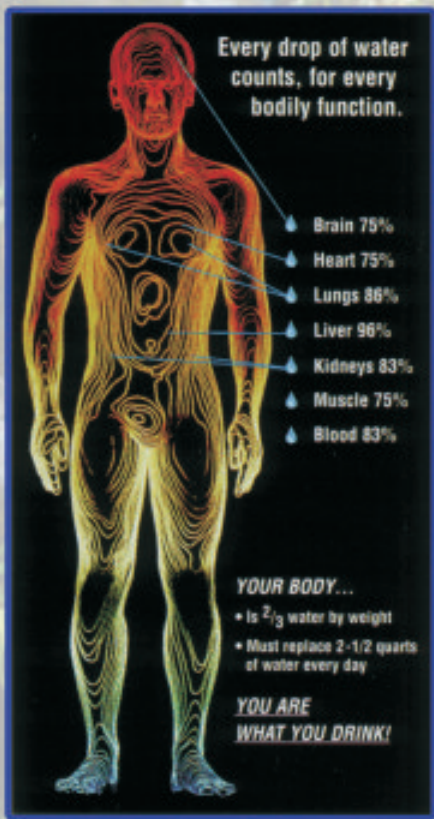

Carbon filtration removes chlorine and chloramine that the municipal water department adds to the water. The carbon filter also improves taste, and removes odor.

Prefiltration of the tap water removes all types of sediment. The prefilter traps dirt, rust, and various other particles.

The Clearly Aqua Slim Line Series also includes an automatic shut-off valve. This device automatically shuts off the system when the tank is full thus saving the unit from wasting water. When the tank has been partially emptied, the unit automatically begins again to process water. This feature conserves water and ensures you will have refreshing great tasting water for you and your family.

Through the use of reverse osmosis technology, we can deliver the great tasting water that you deserve, at a price you can afford.

Clean, Refreshing Water

The world's most advanced water purification...

The world's most advanced water purification technologies in a compact, convenient package for all your drinking and cooking needs. Specifically designed for today's households and families, the Clearly Aqua reverse osmosis unit combines the latest in contemporary styling with a compact high performance design. Multiple filtration technologies provide treatment of chlorine, taste and odors, cysts, sodium and heavy metals in your drinking water.

No need lifting heavy bottled water...

The Clearly Aqua RO drinking water systems are much more convenient and economical than buying bottled water. There is no need to strain your neck and back lifting heavy bottled water or having to wait for bottled water deliveries. With the Clearly Aqua RO drinking water system you can have safe great tasting water within your own home while having the confidence of protecting you and your family from harmful contaminants.

Typical Reverse Osmosis Contaminant Rejection

Contaminant	Rejection %	Contaminant	Rejection %	Contaminant	Rejection %
Sodium	85-93	Iron	95-98	Potassium	87-94
Aluminum	96-99	Magnesium	96-98	Fluoride	87-93
Lead	96-99	Zinc	98-99	Nickel	98-99
Copper	98-99	Chloride	87-93	Silver	93-98
Arsenic	94-96	Nitrate	60-92	Bicarbonate	90-95
Mercury	96-98	Silicate	85-90	Manganese	95-98
Sulfate	96-98	Cyanide	86-92	Ammonium	86-92
Calcium	96-98	Sulphite	98-99	Barium	96-98
Phosphate	96-99	Bacteria	99+	Chromium	96-98

Many uses for

Clearly Aqua RO System:

- Drinking Water
- Juices
- Ice Cubes
- Baby Formula
- Spot free rinse
- Refrigerator
- Batteries
- Coffee/Tea
- Plants
- Aquariums/Pets
- Humidifiers
- Steam Irons
- Cooking
- Low Sodium Diets
- Weight Loss Diets

"Water...the way nature intended"

Clearly Aqua Slim Line

Options:

- 14-50 gallons per day
- 10" or 12" filters
- TDS light pure water indicator
